SENIOR SOFTWARE ENGINEER

A Bachelor of Science graduate in Computer Technology and Programming, I bring extensive experience in improving web processes, with expertise in frontend and backend development using Codeigniter, Laminas (Zend), Laravel, and Symfony PHP frameworks for both personal and corporate applications. Over the past sixteen years, I have worked with numerous industry-leading companies. My background includes proficiency in AWS infrastructure, services management, and GCP systems, as well as credentials in solution analysis, planning, process and time management, platform and database architecture, UI/UX management and coordination, and RestAPI planning.

SKILLS

- PHP
- HTML/CSS
- MySQL

- Codeigniter / Laravel / Laminas
- Javascript / Vue.js
- Linux / AWS / GCP

- Python
- Node.js / Microservices
- Docker / Git

EXPERIENCE

Senior Full Stack Developer   Jan 2023 - Dec 2023

Privilee | Dubai, United Arab Emirates

Privilee is an award-winning membership that offers complimentary access to the UAE's premier beach clubs, five-star hotel pools and beaches, and world-class gyms. I developed Privilee's admin panel (dashboard) and the main application's Rest API endpoints. The company utilizes a technology stack consisting of Laminas, MongoDB, MySQL, Apache, Docker, and AWS.

- Implementing new features and endpoints.
- Investigating and fixing bugs.
- Estimating tasks for each scrum cycle and delivering them on time.
- Writing tests (PHPUnit) for the Rest API and maintaining them for new implementations and refactors.
- Creating database migrations to transfer data from the old admin panel to the new dashboard panel.
- Making improvements to Docker developer environments.
- Collaborating within the team for pull request reviews, suggesting refactors, and approving new developments on Github.
- Engaging with the team to find solutions for enhancing the product as a scrum member.
- Assisting the company's technical support team as a developer in fixing critical customer data or functional problems as a hotfix developer.

Senior Full Stack Developer   Jan 2022 - Dec 2022

Freetimers Web Agency | Northamptonshire, United Kingdom

Maintained and implemented new features for "HUB" product. It has been developed by Laravel & Vue.JS. It allows you to share product, inventory and orders management across multiple websites and other online channels such as eBay and Amazon from a single admin area and database.

- Developed many kinds of Laravel modules for e-commerce projects.
- Specialized in Vue.js and multi-website CMS Laravel e-commerce applications.
- Worked on the redesign and upgrade of very old e-commerce websites. These upgrades are related to older PHP versions.
- Developed modules for the project management software.
- Designed a new Laravel application DB schema and implemented it.

Senior Full Stack Developer   Oct 2019 - Jun 2021

Gasable | Amman, Jordan

Gasable is an energy platform that aims to automate the transportation of energy and green energy from suppliers and distributors to the final customers by mobile application and web application. Fixed bugs and implemented new features for the admin panel. Also, developed a chatbot for the cryptocurrency market.

- Developed new modules for the admin panel and mobile application Restful API.
- Created a chat solution for the application in codeigniter. It allows admins to handle chat requests in the admin panel. Also, implemented Restful API for chat operation for the application. It has been developed by Firebase real time chat database.
